Subject: RE: Question on PFOA monitoring of other medias by DuPont/Chemours

Interesting...I'm going to call R1 and see what's going on with milk/food sampling

I'm also going to send a note to Tom Sinks outlining the communication issue Cecil brought up (data for non PFOA/PFOS compounds analyzed by the drinking water method). I'd like to get a thumbs up from Tom before a short term project.

Thanks,
Steve

Subject: FW: Question on PFOA monitoring of other medias by DuPont/Chemours

FYI – I thought DuPont might have looked into PFOA uptake by animals, crops, etc. See below.

Good morning Rick,

DuPont had entered into an MOU with EPA back in 2006 which included investigating PFOA uptake in animals, fish and vegetation in the vicinity of the Washington Works area. I may have some results of the studies in my files in the office. I'll check when I return to the office tomorrow afternoon.

Roger

Subject: Question on PFOA monitoring of other medias by DuPont/Chemours

Roger,

We are hearing that other regions are involved in some PFAS issues related to other media: biosolids; crops; and milk. In all the monitoring that DuPont/Chemours has done sampling for PFOA in the environment, do you know of any data that they may have collected that represented PFOA concentrations in agricultural product such as crops, vegetables or milk?

Thanks,

Rick
